

What's in a Lesson Plan?

Curriculum Links

Scotland

This is the E + O which relates to the lesson. You will notice there is no level indicated. That is because the lesson has instructions to cover Early through to Second level

UK

This is the comment taken to best describe lesson. As explained above, lessons have differentiation to meet children from 3-11 years old.

Key Concept

This is generally an I can statement. It may need tweaked slightly for younger and older children but it gives a start

Background

This is a blurb that gives you some information about a lesson. If it is part of a sequence of lessons you can see where it fits in here.

Resources

- We always aim to be low on resources and ensure it is things that are easily accessible within a school

Wider Skills

- These are the skills children learn, we have been told they are handy for when you are writing report cards

This is a Sustainable Develop Goal. You can get more info on the SDG's from [me here](#) and in [general here](#). We select the SDGs that are the best fit for the lesson, sometimes more than one.

Lesson

When we are writing a lesson we are thinking about First Level children who are roughly from primary 2 to primary 4 (year 1 - 3 KS1/ 6 - 8 years old).

The information here is for that age group

Assessment

The first thing to note here is we do not expect you to use all strategies. We present a range of strategies as we do not know your learners or you. So, a selection means you can select the strategy(ies) that are the best fit. We do this as we know a number of schools wonder how to assess when taking learning outside.

Older Classes

When we refer to older classes we are referring to children in Second level (primary 5-7/ Year 4-6 - KS2/ age 8-11)

we use what the statement is within Curriculum for Excellence to ensure we are meeting what is stated there

Younger Classes

When we refer to older classes we are referring to children in Early level (Preschool - primary 1)/ preschool- reception early years foundation stage/ age 8-11)

we use what the statement is within Curriculum for Excellence to ensure we are meeting what is stated there
